bittubharath97@gmail.com

Professional Summary:

- Spearheaded data visualization initiatives, contributing 6 years of expertise in the IT industry with a primary focus on Business Intelligence tools such as Power BI and Tableau.
- Executed comprehensive Power BI projects, leveraging 5+ years of hands-on experience in developing intricate Reports and Dashboards using Power BI Desktop and Power BI Services, alongside 3 years of Tableau proficiency.
- Proficiently designed and deployed visually compelling graphics, incorporating dynamic page designs, drill-down functionalities, drop-down menus, and parameterization in both Power BI and Tableau.
- Applied in-depth knowledge of Software Development Life Cycle (SDLC) and contributed to agile Scrum planning methodologies.
- Generated feature-rich Dashboards adhering to web standards, ensuring the creation of interactive reports that meet business requirements.
- Applied data blending techniques to develop Power BI reports and dashboards from diverse data sources, including SQL Server, Oracle, SQL Azure, and AWS.
- Documented and designed the architectural framework for Power BI and Tableau projects, showcasing a meticulous understanding of project structures.
- Exhibited proficiency in crafting complex DAX functions for Power BI and Power Pivot, showcasing an expert grasp on advanced data analysis techniques.
- Established workspaces and content packs to facilitate business users' access to developed reports, ensuring seamless information sharing.
- Implemented scheduled automatic refresh and refresh scheduling in Power BI service, enhancing data accuracy and relevance.
- Developed calculated columns and measures, utilizing Power BI Desktop to employ effective data analysis techniques.
- Conducted weekly presentations for business users, providing insights into reports and addressing changes as needed.
- Demonstrated extensive knowledge in various reporting objects in Tableau, including filters, calculation fields, sets, groups, parameters, and hierarchies.
- Acquired a versatile skill set, encompassing Power BI, Tableau, SQL, Azure, DAX, Advanced Excel, Python, Azure Data Factory, and AWS.

Professional Experience:

- Working as a BI Consultant at **ACL Digital** from Sep -2018 to Till Date.

Educational Qualification:

- Master of Business Administration from New Horizon College of Engineering (2016 -2018).
- B-Com from Ballari Business college, Bellary (2013-2016)

Technical Skills:

- | | |
|----------------------|---|
| • Analytical Tools: | Power BI, Tableau |
| • Operating systems: | Windows 10, Windows 7 |
| • Databases/Source: | Azure, SQL Server 2010/12/16, Snowflake, AWS, Share Point |
| • Reporting Tool | Hive, JIRA. |

Project Experience:**Project # Current:**

Client : RSA INSURANCE.
Role : BI Developer
Environment : Power BI, Tableau, SQL Server, Azure, DAX and Snowflake ...etc.
Duration : Jan 2022 to Till Date.

Description:

RSA insurance group limited is a British multinational general insurance company headquartered in London, England. RSA has major operations in the United Kingdom, Ireland, Scandinavia & Canada. It provides insurance products and services in more than 100 countries through a network of local partners.

ROLES AND RESPONSIBILITIES:

- Develop impactful Power BI and Tableau reports and dashboards by gathering and translating end-user requirements.
- Implement calculated measures and columns with DAX in MS Power BI Desktop.
- Create diverse visualizations such as line charts, bar graphs, histograms, scatter plots, bullets, tree maps, etc.
- Provide continuous maintenance, bug fixes, and develop templates/dashboards for various departments.
- Implement Row Level Security (RLS) and automate reports using subscription methods.
- Work extensively on Period-to-Date calculations (YTD, QTD, MTD, WTD) and dynamic comparisons.
- Monitor and tune the performance of the environment for smooth operation.
- Coordinate with stakeholders to resolve issues or training them in supported applications.
- Expert Knowledge using advanced calculations using power BI desktop.
- Implement data security measures on datasets and reports.
- Configure Gateways in Power BI services for secure and seamless data connections.
- Utilize SQL Server, Snowflake, and Azure databases for data extraction and manipulation.
- Create and manage Groups and content packs in Power BI services.
- Schedule Power BI reports in the online version for automated dissemination.
- Create workspaces and subscriptions, optimizing the organizational structure for efficient report distribution.

Environment: Power BI & Tableau (upgraded as and when available), SQL Server.

Project #2 :

Client : NATIONWIDE
Role : BI Analyst
Environment : Power BI, SQL, SSAS, Data Modelling , Excel, Share point
Duration : Feb 2020 to Dec 2021

Description:

Nationwide is a mutual insurance company and affiliated companies, commonly shortened to nationwide, is a group of large U.S. insurance and financial services companies based in Columbus, Ohio. The company also operates regional headquarters in Scottsdale, Arizona Des Moines, Iowa and San Antonio, Texas.

ROLES AND RESPONSIBILITIES:

- Designed, developed and implemented Tableau Business Intelligence reports.
- Representing data using the visualizations such using Charts.
- Use Trend Lines, Reference Lines and Drop Lines to describe the data.
- Develop, organize, manage and maintain graph, table, slide and document templates that willallow for efficient creation of reports.
- Created action filters, parameters and calculated sets for preparing dashboards and worksheetsin Tableau.

Created the Row level securities for restricting the accessibility of data based on user access levels.

- Utilized Tableau server to publish and share the reports with the business users.
- Hands on building Folders, Sorts, Pivot, Split, Bins, Groups, Hierarchies, sets to create detail level summary reports.
- Hands on Data Blending, Cross DB Joins, LOD's, calculated fields and aggregated fields to compare and analyse data in different perspectives.
- Developed reports using various functions, operators, report filters and variables
- Restricted the data using the Prompts and filters
- Developed reports using Calculations, Conditions, rank Functionalities.
- Developed web reports like drill down master/detail for analysis of parts benefits and headcount.
- Created complicated reports including sub-reports, graphical reports, formula base and well-formatted reports according to user requirements.
- Moved Reports from different environment (Development, Testing, and Production)
- Supporting Tester in testing phase
- Preparation of Unit Test Cases for reports and Performing Unit Testing.
- Designed and implemented star and snowflake schema data models within Power BI, ensuring efficient data retrieval and analysis.
- Building, publishing customized interactive reports and dashboards, report scheduling.

Environment: Power BI, SQL Server, Azure, Snowflake, GCP...etc.

Project #1:

Client	: Giant Eagle
Role	: Consultant
Environment	: Tableau, Power BI and SQL Server, Excel
Duration	: Sep 2018 to Jan 2020

Description:

Giant Eagle is one of the 40 largest family-operated companies in the US and operates Giant Eagle, GetGo and Market District stores. As we continue to grow and expand, our commitment to our core values and the well-being of our Team Members, customers, and our communities is as strong as ever. We listen to what you have to say and do everything we can to provide a safe, caring, family-oriented environment.

ROLES AND RESPONSIBILITIES:

- Understand the Requirements and Functionality of the application from specifications.
- Designed, Developed, tested, and maintained Power BI functional reports based on user requirements.
- Providing continued maintenance and development of bug fixes for the existing and new
- Created Templates/Dashboard for various departments as per the requirement.
- Cleaning and blending multiple data sources to allow for different views on application data in a single dashboard.
- Worked closely with Business users. Interacted with ETL developers, Managers, and members of the QA teams.
- Restricted data for particular users using Row level security and User filters.
- Created the Row level securities for restricting the accessibility of data based on user access levels.
- Modifying a query with a predefined query filter.
- Worked on all kind of reports such as Yearly, Quarterly, Monthly, and Daily.
- Worked on all types of transformations that are available in Power bi query editor.
- Supporting User Acceptance Testing and validating the generated reports in collaboration with Business Users
- Created complex reports utilizing the features like hierarchy, New Calculated Columns, Drill functionality,

Tables, graphs, line Charts and Bar Charts

- Created Parameters to achieve desired functionality
- Developed Power BI and Tableau data visualization using Cross tabs, Area Charts, Line Charts, Heat maps, Geographic Map, Pie Charts, Donut Charts and Bar Charts
- Knowledge on Creating parameters, Quick filters, Action filters and Context filters.
- Being part of the status calls with onsite counter parts understood, worked and repaired for some reports as per the customer's needs.
- Restricted the data using the Prompts and filters.

Internship Project:

Client	: Athenahealth
Role	: Consultant
Environment	: SQL Server 2012, Excel, Power BI, Power Pivot, Power View, Power Map, DAX.
Duration	: Mar 2018 to Aug 2018

Description:

Athenahealth is a private American company that provides network-enabled services for healthcare and point-of-care mobile apps in the United States. The company was founded in 1997 in San Diego and is now headquartered in Boston, Massachusetts. United States.

ROLES AND RESPONSIBILITIES:

- Implemented Visual Level, Page level, report level filters and pinning in dashboards
- Written simple DAX calculation as per the requirement to maintain business measures.
- Worked on report permissions and dashboard permissions to provide access to different users.
- Used Quick insights to get various types of visuals to match the requirements.
- Experience on relationship tab to provide cardinality between fact and dimension tables.
- Involved creating effective reports, dashboards, and publishing into Power bi service.
- Creating the roles for the dashboards, sharing the developed dashboards to the client in power BI.
- Experience in creating content pack library for sharing the dashboards and reports to the colleagues.
- Develop best practices for database design and development activities.
- Connect, import, shape, and transform data for business intelligence (BI).
- Experience in developing Visualization reports and dashboards using Power BI
- Visualize data, author reports, and schedule automated refresh of report

Personal Details:

Date of Birth	: 24-06-1994
Present Address	: #72 Society Area Shriramarangapuram (Village) Devalapura(P/O), Bellary, Karnataka 583129
Languages Knows	: English, Kannada, and Hindi

Declaration:

I consider myself familiar with the above-mentioned aspects. I am also confident of my ability to work in a team. I hereby declare that the above-furnished information is correct to my knowledge.
